

Mojo Barriers is the leading international supplier of stage barrier systems, setting the industry standards for live events.

Products: The favourite among event organisers looking for a safe, sustainable and cost effective system, Mojo's continual investment in R&D results in proprietary barriers which are proven, adaptable and reliable. As well as aluminium stage barriers Mojo has a vast portfolio of other innovative products designed for use at outdoor and indoor events including turnstile systems, line up gates, bar barriers and a range of accessories.

Crowd management: Mojo combines these independently tested products with an expansive knowledge of crowd management and crowd control, and experienced project managers. Taking into consideration a wide variety of factors, Mojo creates bespoke configurations designed with audience, guest and crew safety as the highest priority.

Offering an international network, combined with local service, Mojo Barriers has been the trusted global stage barrier resource for over twenty years.

VARIO & FLEX CORNERS

TECHNICAL SPECS

VARIO

- Same material specifications and looks similar to the straight barrier
- Enables barrier designs to be shaped in variable angles
- Angles ranging from -60° to $+60^\circ$
- Partial floorplate and braces secure strength of the section
- Set angle fixation and additional connection upright to floorplate by one built-in bolt
- Connects to adjoining section by one single bolt
- Also available with black upright
- Use in high crowd pressure areas: ●●●○

FLEX

- Same material specifications and looks similar to as the straight barrier
- Angles from -90° to $+90^\circ$
- Attached to adjoining barrier section with a single bolt and fixed coupling in top rail
- No floorplate
- Able to negotiate small height and width differences
- Also available in black
- Use in high crowd pressure areas: ●●○○○

VARIO CORNER

A middle hinged corner section with partial footplate and braces, the Vario allows barrier designs to be shaped in any angle without compromising system strength. This section allows for creating a variable angle in a barrier line, ranging from -60° to $+60^\circ$. Ideal for use on secondary barricade lines.

FLEX CORNER

A double hinged corner section without footplate, the flex is solely a vertical part, to be connected to adjoining barrier sections. This enables the flex to angle in any shape wanted, varying from -90° to $+90^\circ$ and has the limited option to negotiate height and width. Ideal to go around camera platforms or mix positions.
