

Mojo Barriers is the leading international supplier of stage barrier systems, setting the industry standards for live events.

Products: The favourite among event organisers looking for a safe, sustainable and cost effective system, Mojo’s continual investment in R&D results in proprietary barriers which are proven, adaptable and reliable. As well as aluminium stage barriers Mojo has a vast portfolio of other innovative products designed for use at outdoor and indoor events including turnstile systems, line up gates, bar barriers and a range of accessories.

Crowd management: Mojo combines these independently tested products with an expansive knowledge of crowd management and crowd control, and experienced project managers. Taking into consideration a wide variety of factors, Mojo creates bespoke configurations designed with audience, guest and crew safety as the highest priority.

Offering an international network, combined with local service, Mojo Barriers has been the trusted global stage barrier resource for over twenty years.

**GATEKEEPER**

**TECHNICAL SPECS**

A triple-armed turnstile designed by Mojo Barriers to ensure audience safety while entering or leaving an event site, the Gatekeeper is designed to be integrated into the Mojo Barriers line-up gates. It uses bespoke software to count the number of people entering and/or leaving a controlled area. Even with multiple exits present, the Gatekeeper system monitors and can be set to automatically control audience capacity in real time. The system counts people in and out of the enclosed area and if required can close the door at a certain number per gate or over a number of gates at the same time or even on multiple areas. An ideal solution for free events where organisers still have a need for controlling the footfall, the capacity of the whole or part of the site or simply to find out how many visitors are on site at any one time.

- Integrated into line-up gates
- Fully compatible with the Mojo Barrier system
- Proprietary software counts people entering and exiting a controlled area
- Multiple entrances and exits possible
- Multiple options in counting, limiting and differentiating the ingress/egress
- Quick change from only entry, only exit or crowd-flow both ways
- Real time readout at any given location, data and graphical
- Combines high quality aluminum engineering with intelligent crowd monitoring IT software
- Use in high crowd pressure areas:
