VARIO & FLEX CORNERS

TECHNICAL SPECS

VARIO CORNER

A middle hinged corner section with partial footplate and braces, the Vario allows barrier designs to be shaped in any angle without compromising system strength. This section allows for creating a variable angle in a barrier line, ranging from -60° to +60°. Ideal for use on secondary barricade lines.

FLEX CORNER

A double hinged corner section without footplate, the flex is solely a vertical part, to be connected to adjoining barrier sections. This enables the flex to angle in any shape wanted, varying from -90° to +90° and has the limited option to negotiate height and width. Ideal to go around camera platforms or mix positions.

VARIO

- Same material specifications and looks similar to the straight barrier
- Enables barrier designs to be shaped in variable angles
- Angles ranging from -60° to +60°
- Partial floorplate and braces secure strength of the section
- Set angle fixation and additional connection upright to floorplate by one built-in bolt
- Connects to adjoining section by one single bolt
- Also available with black upright
- Use in high crowd pressure areas: ●●●○

FLEX

- Same material specifications and looks similar to as the straight barrier
- Angles from -90° to +90°
- Attached to adjoining barrier section with a single bolt and fixed coupling in top rail
- No floorplate
- Able to negotiate small height and width differences
- Also available in black
- Use in high crowd pressure areas: ●●○○
